

SAVING THE EARTH STARTS WITH YOU

UCR is Asia's largest, low-cost, fastest and scalable voluntary standard with its own registry ecosystem aimed at accelerating the mining of carbon & water credits from green projects in the Global South

Over 315+ Green Projects

Over 65 million+ Credits Issued

Defossilization, not just Decarbonisation

**The Great Carbon & Water
Reset is Here**

Even the smallest green project
can now earn
carbon & water credits

No Barriers To VCM Entry (Ce-fi or De-fi)

NO MEMBERSHIP/PROJECT UPLOAD FEES

Project Developers and Buyers open free accounts

NO TRANSFER/RETIREMENT FEES

Decentralized in trade (OTC or Exchange)

BLOCKCHAIN TOKEN ENABLED

Developers are can create LIVE environmental DLT tokens using the UCR tokenize functionality without "retiring credits on the registry" for LIVE onboarding of credits, including the underlying emission reduction/avoidance tonne "on chain," for FREE

Carbon Offset Unit (CoU) Structure

Issues Tackled

- Not Double Counted / Avoids Leakage
- UNFCCC CDM Quantified Methodologies
- Independently Audited By 3rd Party Accredited Certification Bodies
- Traceable on the Public Registry
- Real, Permanent and Conservative
- Voluntary (no BAU) projects
- Environmental Additionality
- Do No Net Harm To Society & Environment Test
- 2 UN SDGs or more co-benefits
- Promotes Defossilization
- Rewards Direct Climate Action
- Pre-defined UCR Positive List Eligibility

Promoting Voluntary Environmental Market Maturity

UCR carbon and water credits along with its decentralized and permission-less registry ecosystem, are ideal for the creation of improved sophisticated trading ce-fi and de-fi forward market instruments and other contracts needed to support increased liquidity, transparency and risk management, for greater scale and efficiency.

UCR is the go-to carbon program for high quality rural carbon offsets

Rural biogas digester in India

Entry for even the smallest rural poor UCR carbon project is at par with large industrial wind, hydro and solar projects.

UCR operates the WORLD's 1st & ONLY Water Credits RAINWATER Program

Access to Water is the key issue in the
Global South

“We must work for water, for water to work
for us” — UN Climate Change Executive
Secretary, Simon Stiell (April 2023)

The UCR program

- Addresses BUYERS in the virtual water market and provides an incentive to save water
- Rewards climate action with water credits in areas such as rainwater harvesting, groundwater recharge, ETP/STP treated wastewater gainful end use and other projects related to water conservation and management.

The UCR Water Credits Program Works As An Incentive Model showcasing profitability in water projects without the need for DONATIONS, CSR FUNDS OR CROWDFUNDING OPTIONS in the Global South

The Great Water Reset is Here

Water Credits Selling at USD \$0.20/Credit
1 Water Credit = 1000 litres (1M3)
