## Project Verification Report

### A. Executive Summary

The verification work has been contracted by project aggregator Creduce Technologies Pvt Ltd to perform an independent verification of its UCR project titled “**800 kW Small Scale Wind Power Project by M/S Galaxy Technoforge (India) Pvt Ltd UCR approved project ID:171**”, to establish number of CoUs generated by project over the crediting period from 17/05/2014 to 31/12/2021 (both days included).

Verification for the period : 17/05/2014 to 31/12/2021

In my opinion, the total GHG emission reductions over the crediting / verification period stated in the Monitoring Report (MR), submitted to me is found to be correct and in line with the UCR guidelines. The GHG emission reductions were calculated on the basis of UCR Protocols which draws reference from, Standard Baseline, AMS. I. D – Grid connected renewable electricity generation (Version 18.0). As per the UCR guidelines, the verification was done remotely by way of video calls, phone calls and submission of documents for verification through emails.

I am able to certify that the emission reductions from the 800 kW Small Scale Wind Power Project by M/S Galaxy Technoforge (India) Pvt Ltd (UCR ID – 171) for the period 17/05/2014 to 31/12/2021 amounts to 8255 CoUs (8255 tCO<sub>2e</sub>).

### Scope

The scope of the verification is the independent, objective review and ex post determination of the monitored reductions in GHG emission by the project activity.

1. The quality of data management and records of underlying data;
2. Completeness and accuracy of calculations and baseline emission reports;
3. Proper inclusion and documentation of all project locations,
4. Correct application of offset rules for filling Baseline Period data gaps;
5. Other data, methods and procedures deemed necessary to establish the accuracy of emission reductions.
6. Agreement stating Assurance to avoid double accounting for the project to be verified, along with required proof.

The project is assessed against the requirements of the UCR programme verification Guidance Document, UCR Standard, UCR Programme Manual and related rules and guidelines. Due professional care has been exercised and ethical conduct has been followed by the assessment team during the verification process. The verification report is a fair presentation of the verification activity. The validation of project is not part of present assignment and projects deemed validated post registration by UCR.

### Description of the Project

# NATURELINK SOLUTIONS PRIVATE LIMITED

REG.OFFICE: H. NO. 6/121/1A, PLOT NO. G-1, VAIRAGI NI WADI, NEAR DELHI GATE SURAT – 395007  
Email: [audit@thenaturelink.in](mailto:audit@thenaturelink.in)

The project activity is a renewable power generation activity which incorporates installation and operation of single Wind Turbine Generator (WTG) having capacity of 800 kW manufactured and supplied by Wind World India Pvt Ltd in district Rajkot of the state of Gujarat in India. The details of the project activity are verified with the project report copy submitted for verification.

As mentioned in the Monitoring Report and Emission Reduction Calculation sheet submitted for the verification, the project replaces anthropogenic emissions of greenhouse gases (GHGs) estimated to be approximately 8255 tCO<sub>2</sub>e for the said period under verification, there on displacing 9178 MWh amount of electricity from the generation mix of power plants connected to the Indian electricity grid, which is mainly dominated by the fossil-fuel based power plant.

The project activity is a grid connected renewable energy generation project having capacity of less than 15 MW. The project is a small-scale activity. The methodology applied in the monitoring report is verified against the A.M.S I. D “Grid connected renewable electricity generation” version 18.0.

Verified total emission reductions (ERs) achieved through the project activity during the monitoring period is summarised below:

Summary of the Project Activity and ERs Generated for the Monitoring Period	
Start date of this Monitoring Period	17/05/2014
Carbon credits claimed up to	31/12/2021
Total ERs generated (tCO <sub>2</sub> e)	8255 tCO <sub>2</sub> e
Leakage Emission	0
Project Emission	0

## C. Means of Project Verification

### Desk/document review

The project documents submitted to UCR approved verifier Naturelink Solution Pvt. Ltd. was reviewed by the technical expert and validated by the lead verifier. The documents reviewed involves verification of legal status of individual project owner for consistency, project related documents like installation and commissioning of equipment used in project activity, environmental clearances from state or central pollution control board consent to establish and operate, monitoring related meters/parameters equipment measuring instruments and their calibration records, to establish running of equipment for the crediting period etc.

The PCN is made available to the verifier post approval by UCR which is considered as validated documents and the content of validated PCN are considered as record wherever required. Further the communication agreement made between project owner and project aggregator is document of UCR registry hence the project aggregator is treated as authorized representative of project owner. All the documents submitted by project aggregator to verifier is treated as documents submission on behalf of project owner.

The list of submitted document is available in subsequent section of this verification report under section “Document reviewed or referenced”-section I.

### On-Site inspection- Not applicable.

Date of off-site inspection: DD/MM/YYYY to DD/MM/YYYY	Not applicable as per UCR guideline site visit not conducted for this verification activity.		
No.	Activity performed Off-Site	Site location	Date

### Interviews: Telephonic and mail.

As per UCR guideline the site visit was not conducted during the course of verification and no interview conducted.

No.	Interview			Date	Subject
	Last name	First name	Affiliation		
1.	Nandaniya	Ashwin	Galaxy Technoforge	30/08/2022	Meter calibration, project activities and overview.

## D. Project Verification findings

### D.1 Identification and eligibility of project type

<b>Means of Project Verification</b>	Project has taken reference of CDM methodology AMS-I D, version 18 Grid Connected Renewable Electricity Generation.
<b>Findings</b>	<ol style="list-style-type: none"><li>1. Project activity is described through UCR approved PCN.</li><li>2. UCR project communication agreement clearly defines the Project Proponent and Project Aggregator.</li></ol>
<b>Conclusion</b>	<p>The UCR approved format is used for description and project meets the requirement of UCR verification standard and UCR project standard.</p> <p>UCR project communication agreement submitted to verifier and the same has been verified. Methodology referenced and applied appropriately describing the project type. The eligibility of project aggregator is verified using UCR communication agreement, Project correctly applies the verification standard, UCR project standard and UCR regulations.</p> <p>The project activity is overall meeting the requirements of UCR Verification standard and UCR project standard.</p>

### D.2 General description of project activity

<b>Means of Project Verification</b>	The project activity involves operation of 0.8 MW of small-scale wind power project and its commissioning date was verified through the commissioning certificate of the project. The power evacuation at the substation is confirmed by Certificate for Share of Electricity.
<b>Findings</b>	<ol style="list-style-type: none"><li>1. Project Commissioning date is mentioned in the commissioning certificate.</li><li>2. Turbine Capacity is same as mentioned in the commissioning certificate provided by GEDA.</li><li>3. Project implementation and sale of energy abide the wheeling agreement.</li></ol>
<b>Conclusion</b>	The description of the project activity is verified to be true based on the review of PCN, MR, Commissioning Certificate, Purchase Order Copies.

### D.3 Application and selection of methodologies and standardized baselines

# NATURELINK SOLUTIONS PRIVATE LIMITED

REG.OFFICE: H. NO. 6/121/1A, PLOT NO. G-1, VAIRAGI NI WADI, NEAR DELHI GATE SURAT – 395007  
Email: [audit@thenaturelink.in](mailto:audit@thenaturelink.in)

## D.3.1 Application of methodology and standardized baselines

<b>Means of Project Verification</b>	Project has taken reference of CDM methodology A.M.S I.D. CDM website is referred to check the latest version of the methodology. For the applicability mentioned in the PCN and MR, turbine Specification, commissioning certificate.
<b>Findings</b>	The methodology applied is applicable for the project activity.
<b>Conclusion</b>	Methodology application is appropriate meeting the requirements of UCR and its standardized baseline. The methodology version is correct and valid. Referenced methodology is applicable to project activity.

## D.3.2 Clarification on applicability of methodology, tool and/or standardized baseline

<b>Means of Project Verification</b>	The documents reviewed are A.M.S I. D “Grid connected renewable electricity generation” version 18, UCR Program standard, and UCR Verification Standard.
<b>Findings</b>	Emission factor is taken as per the UCR standard.
<b>Conclusion</b>	The emission factor considered for the calculation of the emission reductions is verified with the UCR Program Standard. The total installed electrical energy generation capacity of the project equipment does not exceed 15 MW thus meeting the requirement of small-scale project.

## D.3.3 Project boundary, sources and GHGs

<b>Means of Project Verification</b>	Letter from CPCB dated 07/03/2016 No. B-29012/ESS(CPA)/2015-16. PCN section B.4.
<b>Findings</b>	Project boundary is appropriately defined in PCN which is physical and geographical site of power house.
<b>Conclusion</b>	Project boundary is correctly defined in revised PCN version 01. GHG source correctly identified and reported. The project meets the requirements of UCR project standard, Verification standard and methodology requirements for boundary, GHG source.

## D.3.4 Baseline scenario

<b>Means of Project Verification</b>	MR Section C.5 and General Project Eligibility Criteria and Guidance, UCR Standard.
--------------------------------------	---

# NATURELINK SOLUTIONS PRIVATE LIMITED

REG.OFFICE: H. NO. 6/121/1A, PLOT NO. G-1, VAIRAGI NI WADI, NEAR DELHI GATE SURAT – 395007  
 Email: [audit@thenaturelink.in](mailto:audit@thenaturelink.in)

<b>Findings</b>	None
<b>Conclusion</b>	Baseline scenario is appropriately described. Calculated baseline emission for each vintage year of crediting period is rounded down as per UCR standard.

## D.3.5 Estimation of emission reductions or net anthropogenic removal

<b>Means of Project Verification</b>	Certificate For Share of Electricity, and General Project Eligibility Criteria and Guidance, calibration report, and UCR Standard, page 4.
<b>Findings</b>	None
<b>Conclusion</b>	Certificate for Share of Electricity is considered as an acceptable document to check actual energy generation for each month. Copy of the sample has been cropped and attached for reference purpose.

## D.3.6 Monitoring Report

<b>Means of Project Verification</b>	<p>Certificate For Share of Electricity, Power Purchase Agreement, and General Project Eligibility Criteria and Guidance, UCR Standard, page 4.</p> <p><u>Meter installed at site</u></p> 
<b>Findings</b>	CL-1 was raised. The calibration report is not available as well as meter photos are not available.
<b>Conclusion</b>	CL-1 is closed. The energy meter was located on the pole of high-tension line which is sealed by the GETCO authority. SLDC share of electricity certificate is considered for the energy generation reporting and it was cross checked with invoice generated by the PGVCL and it was attached in appendix.

# NATURELINK SOLUTIONS PRIVATE LIMITED

REG.OFFICE: H. NO. 6/121/1A, PLOT NO. G-1, VAIRAGI NI WADI, NEAR DELHI GATE SURAT – 395007  
Email: [audit@thenaturelink.in](mailto:audit@thenaturelink.in)

## D.4 Start date, crediting period and duration

<b>Means of Project Verification</b>	PCN and MR, Purchase order of turbine and technical Specification sheet, Commissioning certificate, Detailed Project Report documents were referred.
<b>Findings</b>	Declared information is correct and verified.
<b>Conclusion</b>	The start date, crediting period and project duration reported correctly and this meets the requirements of UCR verification standard and UCR project standard.

## D.5 Positive Environmental impacts

<b>Means of Project Verification</b>	PCN
<b>Findings</b>	None.
<b>Conclusion</b>	The positive environmental impact meets the requirement of UCR verification standard and UCR project standard.

## D.6 Project Owner- Identification and communication

<b>Means of Project Verification</b>	PCN, Communication Agreement, MR, Purchase order of Turbine, Commissioning certificate, Power Purchase Agreement.
<b>Findings</b>	Declared information is correct and verified.
<b>Conclusion</b>	Project owner identified through communication agreement signed between PP and PA. Equipment purchase order and commission verified. Also, legal document like Power Purchase Agreement clearly establishes the project owner. The identification and communication correctly meet the requirement of project verification and UCR project standard.

## D.7 Positive Social Impact

<b>Means of Project Verification</b>	Project has provided temporary employment to local people during its installation and commissioning. Also post commissioning some of people have employed permanently and local people were engaged leading to social financial benefit to surrounding. Overall social impact of project implementation is positive on the surrounding area.
--------------------------------------	--

# NATURELINK SOLUTIONS PRIVATE LIMITED

Email: [audit@thenaturelink.in](mailto:audit@thenaturelink.in)

<b>Findings</b>	--
<b>Conclusion</b>	Project has overall positive social impact.

## D.8 Sustainable development aspects (if any)

<b>Means of Project Verification</b>	Not Applicable
<b>Findings</b>	--
<b>Conclusion</b>	The Project has capability to address SDG 7 Affordable and Clean Energy and SDG 13 Climate Action

## E. Internal quality control:

- Due professional care has been taken while reviewing the submitted document.
- There is no conflict of interest as the verifier has no other engagement with either aggregator or project owner directly or indirectly.
- Verification team consists of experience personnel.
- Technical review is performed by experienced and independent person.

## F. Project Verification opinion:

Considering the above mentioned verification conducted on the basis of UCR Protocol, which draws reference from UCR Protocol Standard Baseline, AMS.I.D – Grid connected renewable electricity generation (Version 18.0), the documents submitted during the verification including the data, PPA, Purchase order, Calibration Report , Commissioning Certificate, Project Concept Note (PCN), Monitoring Report (MR), I am able to certify that the emission reductions from the project - 800 kW Small Scale Wind Power Project by M/S Galaxy Technoforge (India) Pvt Ltd (UCR ID – 171) for the period 17/05/2014 to 31/12/2021 amounts to 8255 CoUs (8255 tCO<sub>2e</sub>).

<b>TOTAL</b>		<b>59.200</b>	<b>10090.638</b>	<b>23.000</b>
<b>(C) CONSIDERATIONS FOR ISSUING ABOVE STATEMENT</b>				
1	Active Energy received at 66KV Vadali S/S substation is computed by summation of net energy recorded in Special Energy (ABT) meter in every 15 minute basis. The detail computation of active energy is carried out by SLDC and block wise computation and meter data is published on website.			
2	Reactive energy supplied to Wind Farm from 66KV Vadali S/S is computed as per the conventional Tariff Meters. The detail computation of reactive energy is carried out by GEDA and circulated by them to all wind owners in advance.			
3	Share of wind Farm in the electricity received at Interface point of 66KV Vadali S/S is computed by GEDA on the basis of energy generation recorded on each wind energy generation during the period specified as above.			
4	Reactive Energy Supplied to Wind Farm		As on	As on
			31.05.2014	01.05.2014
	Mvarh Imp. Lag.....TR-1		0.0730	0.0730
	Mvarh Exp. Lead.....TR-1		0.0580	0.0460
	Mvarh Imp. Lag.....TR-2		0.0680	0.0680
Mvarh Exp. Lead.....TR-2		0.0550	0.0440	
<b>TOTAL</b>				<b>11.0000</b>
				<b>23.000</b>
5	After careful consideration of various representation received before SLDC-Gujarat, SLDC has issued this statement for intermediate period to circumvent difficulties faced by various wind owners. This will be continued till the revised mechanism is in place. The any change in procedure will be communicated seperately.			
6	SLDC has certified net Actual Energy injection for the pooling station covered under RRF mechanism as per the Hon'ble CERC order dated 07th January'14 in Suo-Motu Petition No. 356/SM/ 2013 "suspended the commercial mechanism specified in approved procedure for RRF mechanism".			
<b>(D) CERTIFICATE</b>				
This is to certify that energy generated by Wind Turbine Generators as specified in Para "A" and received at 66KV Vadali Substation during the month of <b>May'2014</b> at the period specified as above i.e. NET Energy is <b>10090.638MWh</b> and shared by wind farm owners as mentioned in Para (B). This certificate is issued by SLDC as per submission of GEDA and for the purpose of settlement between distribution licensee, wind farm owners supplying energy and consumers receiving such energy.

**CERTIFICATE OF COMMISSIONING**

This is to certify that **M/s Galaxy Technoforge (India) Pvt. Ltd.**, having registered office at Survey No. 26, Plot No. 3, 4, 5, 11, 12 & 13 B/h. Soham Dhana Industries, Shapar Main Road, Shapar (Veraval), Rajkot - 360 0024 (Gujarat) have commissioned **0.80 MW** capacity windfarm consisting of **1 (One)** numbers of new Wind Turbine Generator (WTG) as per the WTG ID no and date of commissioning given below

Make of each Wind Turbine Generator (WTG) : Wind World  
Capacity of each Wind Turbine Generator : 800 kW  
No of Wind Turbine Generator(s) : 1 (One)  
Total capacity of the Windfarm : 0.800 MW

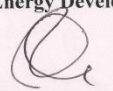

Sr No	Details of site of installation			Revenue Survey No	Date of Comm.	Location No.	WTG ID number(s)
	Village	Taluka	District				
1	Rajavadla (Jam)	Jasdan	Rajkot	12	17/05/2014	999	WWIL/800/13-14/3431

This windfarm is connected by 33 kV grid line to 33/66 kV Vadali site sub-station at Vadali. The Vadali site Sub Station is connected to 66 kV GETCO Vichhiya Sub Station.

Electricity generation report for the purpose of commissioning of windfarm:

Sr No	WTG ID No.	Date	Time (Hrs.)		Meter (kWh)
