Project Verification Report

A. Executive Summary

The verification work has been contracted by project aggregator Creduce Technologies Pvt Ltd to perform an independent verification of its UCR project titled **“5 MW Solar Power Project by Vinati Organics Limited UCR approved project ID:062**, to establish a number of CoUs generated by the project over the crediting period from 30/09/2021 to 31/12/2022 (both days included).

Verification for the period : 30/09/2021 to 31/12/2022

In my opinion, the total GHG emission reductions over the crediting/verification period stated in the Monitoring Report (MR), submitted to me is found to be correct and in line with the UCR guidelines.

The GHG emission reductions were calculated on the basis of UCR Protocols which draws reference from, Standard Baseline, AMS. I. D – Grid connected renewable electricity generation (Version 18.0). Owing to the Covid pandemic, the verification was done remotely by way of video calls, phone calls and submission of documents for verification through emails.

I am able to certify that the emission reductions from the 5 MW Solar Power Project by Vinati Organics Limited (UCR ID – 062) for the period 30/09/2021 to 31/12/2022 amounts to **11,110 CoUs (11,110 tCO₂e)**.

Scope

The scope of the verification is the independent, objective review and ex-post determination of the monitored reductions in GHG emission by the project activity.

1. The quality of data management and records of underlying data;
2. Completeness and accuracy of calculations and baseline emission reports;
3. Proper inclusion and documentation of all project locations,
4. Correct application of offset rules for filling baseline period data gaps;
5. Other data, methods, and procedures deemed necessary to establish the accuracy of emission reductions.
6. Agreement stating Assurance to avoid double accounting for the project to be verified, along with required proof.

The project is assessed against the requirements of the UCR programme verification Guidance Document, UCR Standard, UCR Programme Manual and related rules and guidelines. Due professional care has been exercised and ethical conduct has been followed by the assessment team during the verification process. The verification report is a fair presentation of the verification activity. The validation of project is not part of present assignment and projects deemed validated post registration by UCR.

NATURELINK SOLUTIONS PRIVATE LIMITED

REG.OFFICE: H. NO. 6/121/1A, PLOT NO. G-1, VAIRAGI NI WADI, NEAR DELHI GATE SURAT – 395007
Email: audit@thenaturelink.in

Description of the Project

As described in the Project Concept Note (PCN), the project activity involves installation and operation of solar PV power project of total 5 MW. The project is located at Mangrul village, in Solapur district, in the state of Maharashtra, in India. The electricity generated from this power plant is consumed by the M/S Vinati Organics through open access as per the MERC regulation 2016.

The technical specification of the project is as follows;

Parameter	Description
Total number of Photovoltaic Modules	11,932
Rating of Photovoltaic Module	545 Wp
Module make	Trina
Cell type	Monocrystalline Silicon
No. of Inverter	1 (5000 kVA) AC output
Inverter	Central Inverter
Inverter make	Sungrow (SG5000UD-20)
PV Connectors	MC4 type, 1500VDC, IP68

As mentioned in the monitoring report and emission reduction calculation sheet submitted for verification, the project replaces anthropogenic emissions of greenhouse gases (GHGs) estimated to be approximately **11,110 tCO₂e** for the said period under verification, there on displacing 12345 MWh amount of electricity from the generation mix of power plants connected to the Indian electricity grid, which is mainly dominated by the fossil-fuel based power plant.

The project activity is a grid connected renewable energy generation project having capacity of less than 15 MW. The project is a small-scale activity. The methodology applied in the Monitoring Report is verified against the A.M.S I. D “Grid connected renewable electricity generation” version 18.0.

Verified total emission reductions achieved through the project activity during the monitoring period is summarised below:

Summary of the Project Activity and ERs Generated for the Monitoring Period	
Start date of this Monitoring Period	30/09/2021
Carbon credits claimed up to	31/12/2022
Total ERs generated (tCO ₂ e)	11,110 tCO ₂ e
Leakage emission	0
Project Emission	0

C. Means of Project Verification

C.1 Desk/document review

The project documents submitted to UCR approved verifier Naturelink Solution Pvt. Ltd. was reviewed by the technical expert and by the lead verifier. The documents reviewed involves verification of legal status of individual project owner for consistency, project related documents like installation and commissioning of equipment used in project activity. Environmental clearances from state or central pollution control board Consent to establish and operate, monitoring related meters/parameters equipment measuring instruments and their calibration records, to establish running of equipment for the crediting period.

The PCN is made available to the verifier post approval by UCR which is considered as validated documents and the content of validated PCN is considered as record wherever required. Further, the communication agreement made between the project owner and the project aggregator is a document of the UCR registry hence the project aggregator is treated as an authorized representative of the project owner. All the documents submitted by the project aggregator to the verifier is treated as documents submitted on behalf of the project owner.

The list of submitted documents is available in a subsequent section of this verification report under the section “Document reviewed or referenced”-section I.

C.2 On-Site inspection- Not applicable.

Date of off-site inspection: DD/MM/YYYY to DD/MM/YYYY	Not applicable as per UCR guideline site visit not conducted for this verification activity.		
No.	Activity performed Off-Site	Site location	Date
1.			

C.3 Interviews:

As per UCR guidelines, the site visit was not conducted during the course of verification, and the only interview was conducted.

D. Project Verification findings

D.1 Identification and eligibility of project type

Means of Project Verification	Project has taken reference of CDM methodology AMS-I.D, version 18 Grid Connected Renewable Electricity Generation.
Findings	<ol style="list-style-type: none">1. Project activity is described through UCR-approved PCN.2. UCR project communication agreement clearly defines the Project Proponent and Project Aggregator.
Conclusion	<p>The UCR-approved format is used for description and project meets the requirement of UCR verification standard and UCR project standard.</p> <p>UCR project communication agreement has been verified. Methodology referenced and applied appropriately describing the project type. The eligibility of the project aggregator is verified using UCR communication agreement, Project correctly applies the verification standard, UCR project standard and UCR regulations.</p> <p>The project activity is overall meeting the requirements of UCR Verification standard and UCR project standard.</p>

D.2 General description of project activity

Means of Project Verification	Document verification of detailed project reports, commissioning certificates, calibration reports, power plant and meter photographs, and joint metering reading reports.
Findings	CL 1 is raised. The PCN describes that there is a wheeling agreement signed between PP and MSETCL but no agreement was signed between PP and MSETCL.
Conclusion	<p>CL-1 is closed. As there was an error in describing the project activity. The electricity is withdrawn by M/S Vinati Organics through open access as per the MERC regulation 2016.</p> <p>The description of the project activity is verified to be as per the actual electricity generation from the solar plant based on the review of the emission reduction excel sheet, PCN, MR, Commissioning Certificate, DPR, and PPA.</p>

D.3 Application and selection of methodologies and standardized baselines

D.3.1 Application of methodology and standardized baselines

NATURELINK SOLUTIONS PRIVATE LIMITED

REG.OFFICE: H. NO. 6/121/1A, PLOT NO. G-1, VAIRAGI NI WADI, NEAR DELHI GATE SURAT – 395007
Email: audit@thenaturelink.in

Means of Project Verification	The project has taken the reference of CDM methodology A.M.S I.D. CDM website is referred to check the latest version of the methodology. For the applicability mentioned in the PCN and MR, the commissioning certificate, and detailed project report documents were referred.
Findings	The methodology applied is applicable to the project activity.
Conclusion	It is a greenfield project and supplies the net electricity to the national grid. Hence, the methodology applied is appropriately meeting the requirements of UCR and its standardized baseline. The methodology version is correct and valid. The referenced methodology is applicable to project activity.

D.3.2 Clarification on applicability of methodology, tool and/or standardized baseline

Means of Project Verification	The documents reviewed are A.M.S I. D “Grid connected renewable electricity generation” version 18, UCR Program standard, and UCR Verification Standard.
Findings	The emission factor is taken as 0.9 tCO ₂ /MWh as per UCR standard.
Conclusion	The emission factor considered for the calculation of the emission reductions is verified with the UCR Program Standard. The total installed electrical energy generation capacity of the project equipment does not exceed 15 MW thus meeting the requirement of small-scale project.

D.3.3 Project boundary, sources and GHGs

Means of Project Verification	Letter from CPCB dated 07/03/2016 No. B-29012/ESS(CPA)/2015-16. PCN section B.4.
Findings	Project boundary is appropriately defined in PCN version 2.0 which is the physical and geographical site of a powerhouse.
Conclusion	The project boundary is correctly defined in the revised PCN version 2.0. GHG source correctly identified and reported. The project meets the requirements of UCR project standard, verification standard, and methodology requirements for GHG sources.

D.3.4 Baseline scenario

NATURELINK SOLUTIONS PRIVATE LIMITED

REG.OFFICE: H. NO. 6/121/1A, PLOT NO. G-1, VAIRAGI NI WADI, NEAR DELHI GATE SURAT – 395007
Email: audit@thenaturelink.in

Means of Project Verification	PCN Section B.5 and General Project Eligibility Criteria and Guidance, UCR Standard.
Findings	The declared information is correct and verified.
Conclusion	Baseline scenario is appropriately described. The conservative value for emission for each vintage year during the crediting period has been considered. The baseline scenario is in accordance with UCR project verification standard and UCR project standard.

D.3.5 Estimation of emission reductions or net anthropogenic removal

Means of Project Verification	Meter calibration reports, joint meter reading reports, and general project eligibility criteria and guidance, UCR Standard, page 4.
Findings	None.
Conclusion	<p>The emission reduction calculation sheet attached with MR was rounded down for each vintage year.</p> <p>Monitoring parameters as reported adequately represents the parameters relevant to emission reduction calculation. The emission factor for electricity is as per UCR standard for electricity components. Based on monitoring and emission reduction are correctly calculated and reported. The monitoring report meets the requirements of UCR project verification requirements.</p>

D.3.6 Monitoring Report

Means of Project Verification	<p>Meter calibration reports joint meter reading reports, and general project eligibility criteria and guidance, UCR Standard, page 4.</p> <p>Energy Meters installed at site:</p> <p style="text-align: center;"><u>Main Meter</u></p>

Check Meter

Findings

None.

Conclusion

Calibration reports of the meters provided by PP certify that errors are within permissible limits and details are mentioned below.

Meter	Meter Sr. No	Calibration Date
Main Meter	21005545	30/08/2021
Check Meter	21005546	30/08/2021

The monitoring parameter reported in MR adequately represents the parameters relevant to emission reduction calculation. The calibration report ensures the accuracy of the data reported. The

NATURELINK SOLUTIONS PRIVATE LIMITED

Email: audit@thenaturelink.in

	number of CoUs generation is calculated based on this accurately reported data. The calculation was done using an excel sheet where all the parameters were reported. The emission factor for electricity is as per UCR standard. In the monitoring report, emission reduction calculations are correctly calculated and reported. The monitoring report meets the requirements of UCR project verification requirements.
--	---

D.4 Start date, crediting period and duration

Means of Project Verification	PCN 2.0, MR, commissioning certificate, detailed project report and JMRs documents were referred.
Findings	None
Conclusion	The start date of the project activity is 30/09/2021 which is the commissioning date of the project. Crediting period for this verification report is as per the monitoring report submitted by PP which is from 30/09/2021 to 31/12/2022.

D.5 Positive Environmental impacts

Means of Project Verification	PCN 2.0
Findings	The declared information is correct and verified.
Conclusion	The positive environmental impact meets the requirement of the UCR verification standard and UCR project standard.

D.6 Project Owner- Identification and communication

Means of Project Verification	PCN, Communication Agreement, MR, Purchase order of Solar PV panel, Solar Inverter, Commissioning certificate, Power Purchase Agreement.
Findings	The declared information is correct and verified.
Conclusion	The project owner was identified through a communication agreement signed between PP and PA. Also, a legal document like a power purchase agreement/MSEDCL commissioning letter clearly establishes the project owner. The identification and communication correctly meet the requirement of project verification and UCR project standard.

NATURELINK SOLUTIONS PRIVATE LIMITED

REG.OFFICE: H. NO. 6/121/1A, PLOT NO. G-1, VAIRAGI NI WADI, NEAR DELHI GATE SURAT – 395007
Email: audit@thenaturelink.in

D.7 Positive Social Impact

Means of Project Verification	The project has provided temporary employment to local people during its installation and commissioning. Also, post-commissioning some of the people have been employed permanently and local people were engaged leading to social financial benefits. Overall social impact of project implementation is positive in the surrounding area.
Findings	--
Conclusion	The project has an overall positive social impact.

D.8 Sustainable development aspects (if any)

Means of Project Verification	Not Applicable
Findings	--
Conclusion	The Project has the capability to address SDG 7 Affordable and Clean Energy and SDG 13 Climate Action

E. Internal quality control:

- Due professional care has been taken while reviewing the submitted document.
- There is no conflict of interest as the verifier has no other engagement with either the aggregator or project owner directly or indirectly.
- Verification team consists of experienced personnel.
- Technical review is performed by an experienced and independent person.

F. Project Verification opinion:

Considering the above-mentioned verification conducted on the basis of UCR Protocol, which draws reference from UCR Protocol Standard and Baseline, AMS.I.D – Grid connected renewable electricity generation (Version 18.0), the documents submitted during the verification including the PPA, DPR, commissioning certificate, JMRs and calibration reports, Project Concept Note (PCN 2.0), monitoring report, I am able to certify that the emission reductions from the project - 5 MW Solar Power Project by Vinati Organics Limited (UCR ID – 062) for the period 30/09/2021 to 31/12/2022 amounts to **11,110 CoUs (11,110 tCO₂e)**.
